

Investor Presentation

RIU, SYDNEY

May 2024

ASX:GLN | FSX:9CH

Disclaimers & Important Information

This presentation has been prepared by Galan Lithium Limited.

Competent Persons

The information contained herein that relates to exploration results and geology is based on information compiled or reviewed by Dr Luke Milan, who has consulted to the Company. Dr Milan is a Member of the Australasian Institute of Mining and Metallurgy and has sufficient experience which is relevant to the style of mineralisation and types of deposit under consideration and to the activity which they are undertaking to qualify as a Competent Persons as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Dr Milan consents to the inclusion of his name in the matters based on the information in the form and context in which it appears.

The information in contained herein that relates to the latest Mineral Resources estimation approach at Hombre Muerto West and Candelas was compiled by Mr. Carlos Eduardo Descourvieres. Mr Descourvieres is an employee of WSP Consulting (Chile) and a Member of the Australian Institute of Mining and Metallurgy. He has sufficient experience relevant to the assessment of this style of mineralisation to qualify as a Competent Person as defined by the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves - The JORC Code (2012)'. Mr Descourvieres consents to the inclusion of his name in the matters based on his information in the form and context in which it appears.

The information contained herein that relates to Project background, brine extraction method, recovery method and Project layout, have been directed by Mr. Marcelo Bravo. Mr. Bravo is Chemical Engineer and managing partner of Ad-Infinitem SpA. with over 25 years of working experience, he is a Member of the Chilean Mining Commission and has sufficient experience which is relevant to the activity which they are undertaking to qualify as a Competent Persons as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr. Bravo consents to the inclusion of his name in the matters based on the information in the form and context in which it appears.

The information contained herein that relates to the Ore Reserves estimation approach at Hombre Muerto West was compiled by Mr Rodrigo Riquelme. Mr Riquelme is a Principal Consultant of Geolnova and is assisting WSP Consulting (Chile). He has experience relevant to the assessment of this style of mineralisation to qualify as a Competent Person as defined by the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves - The JORC Code (2012)". Mr Riquelme consents to the inclusion in this report of the matters based on his information in the form and context in which it appears.

The information contained herein that relates to the Project infrastructure, Capex, Opex and economic evaluation was reviewed by Ernest Burga, General Manager of Andeburg Consulting Services Inc. He has sufficient experience relevant to the activity which they are undertaking to qualify as a Competent Persons as defined by the "Australasian Code for Reporting for Exploration Results, Mineral Resources and Ore Reserves - The JORC Code (2012)". Mr Burga consents to the inclusion in this report of the matters based on his information in the form and context in which it appears.

The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements, and that all material assumptions and technical parameters have not materially changed. The Company also confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

Cautionary Statements

The Definitive Feasibility Studies (Phase 1 and Phase 2 DFS) referred to in this presentation were respectively announced on 3 July 2023 (ASX: "Phase 1 of Hombre Muerto West (HMW) DFS Delivers Compelling Economic Results for Accelerated Production") and 3 October 2023 (ASX: Phase 2 DFS Confirms Tier One Status of Hombre Muerto West (HMW) Lithium Brine Project in Argentina) are based upon a JORC Code Compliant Mineral Resource Estimate announced 1 May 2023 (ASX: "Galan's 100% Owned HMW Project Resource Increases to 6.6Mt LCE @ 880mg/l Li (72% in Measured Category)" (inclusive of the updated Proven and Probable Ore Reserve referred to in the Phase 2 DFS announcement). Galan confirms that there are no Inferred Resources included in the DFS production schedule and that the schedule is comprised 100% of Ore Reserves (Proven 101.2 kt LCE @ 884 mg/Li and Probable 705.2kt LCE @ 861.5 mg/Li).

The Mineral Resources underpinning the Ore Reserve and production target in the Phase 2 DFS have been prepared by a competent person in accordance with the requirements of the JORC Code (2012). For full details of the Mineral Resources and Ore Reserve estimates, please refer to the body of the Phase 2 DFS announcement on 3 October 2023 and the latest Resource Estimate announcement dated 27 March 2024. Galan confirms that it is not aware of any new information or data that materially affects the information included in these announcements. All material assumptions and technical parameters underpinning the estimates in the ASX releases continue to apply and have not materially changed.

Process and engineering designs for the Phase 1 and Phase 2 DFS were developed to support capital and operating estimates to an accuracy of -10% to +15%. Key assumptions that the Phase 1 and Phase DFS were based on (including those defined as Material Assumptions under ASX Listing Rule 5.9.1) are outlined in the body of the DFS announcements (and Appendix 1's) dated 3 July 2023 and 3 October 2023. Galan believes the production target, forecast financial information derived from that target and other forward-looking statements included in the Phase 1 and Phase 2 DFS announcements dated 3 July 2023 and 3 October 2023, respectively, are based on reasonable grounds.

Several key steps need to be completed in order to bring the Hombre Muerto West Project into production. Many of these steps are referred to in the Phase 1 and Phase 2 DFS announcements dated 3 July 2023 and 3 October 2023, respectively. Investors should note that if there are delays associated with completion of those steps, outcomes may not yield the expected results (including the timing and quantum of estimated revenues and cash flows). The economic outcomes associated with the Phase 1 and Phase 2 DFS are based on certain assumptions made for commodity prices, exchange rates and other economic variables, which are not within the Company's control and subject to change. Changes in such assumptions may have a material impact on the economic outcomes.

The Company confirms that all material assumptions underpinning the production target and the derived financial information disclosed in the Phase 2 DFS announced by the Company on 3 October 2023 continue to apply and have not materially changed.

To achieve the range of outcomes indicated in the DFS, funding will likely be required. There is no certainty that Galan will be able to source the amount of funding when required. It is also possible that such funding may only be available on terms that may be dilutive to or otherwise affect the value of Galan's shares. It is also possible that Galan could pursue other value realisation strategies such as an off-take with prepayment, sale, partial sale or joint venture of the Hombre Muerto West Project.

Forward-Looking Statements

Some of the statements appearing in this presentation may be in the nature of forward-looking statements. Such statements are only predictions and are subject to inherent risks and uncertainties. Those risks and uncertainties include factors and risks specific to the industries in which Galan Lithium Limited operates and proposes to operate as well as general economic conditions, prevailing exchange rates and interest rates and conditions in the financial markets, among other things. Actual events or results may differ materially from the events or results expressed or implied in any forward-looking statement. No forward-looking statement is a guarantee or representation as to future performance or any other future matters, which will be influenced by several factors and subject to various uncertainties and contingencies, many of which will be outside Galan Lithium Limited's control. Galan Lithium Limited does not undertake any obligation to update publicly or release any revisions to these forward-looking statements to reflect events or circumstances after today's date or to reflect the occurrence of unanticipated events. No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions or conclusions contained in this presentation. To the maximum extent permitted by law, none of Galan Lithium Limited, its directors, employees, advisors, or agents, nor any other person, accepts any liability for any loss arising from the use of the information contained in this presentation. You are cautioned not to place undue reliance on any forward-looking statement. The forward-looking statements in this presentation reflect views held only as at the date of this presentation.

**HMW Exploration
1st Drill Hole
(September 2019)**

**HMW Phase 1
Construction
Progress
(30 April 2024)**

The Highest Grade, Lowest Impurity Lithium Project in Argentina

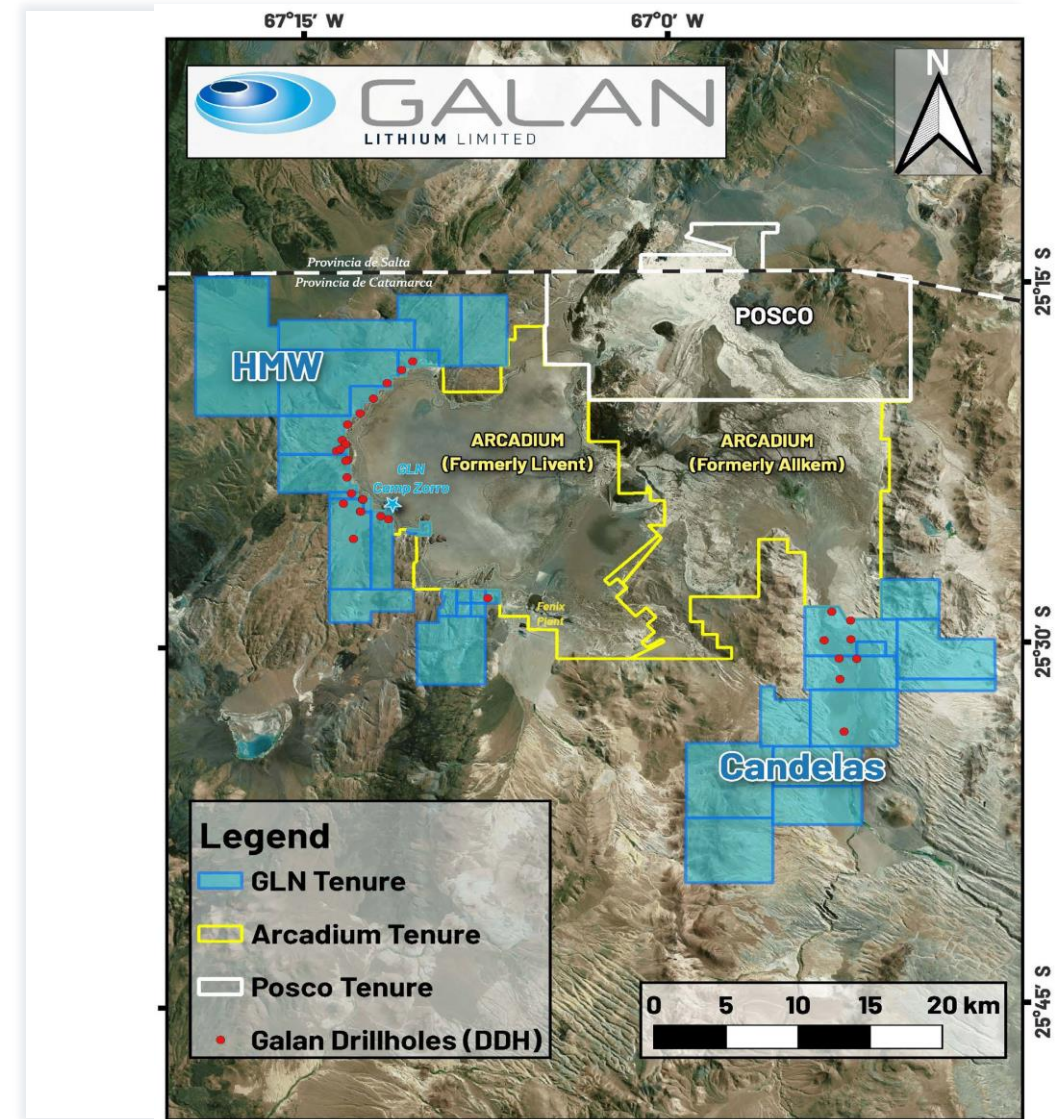

World-Class Location / Low Cost Production

HMW Brine production - lower operating cost than the majority of spodumene producers

20+ year history of production within salar

- ✔ Significant regional infrastructure and investment with excellent government and community support
- ✔ Highest grade, lowest impurity lithium brine assets in Argentina
- ✔ 8.6Mt LCE total resource @ 859 mg/l Li¹
- ✔ Staged production plan up to 60ktpa LCE²
- ✔ Pending due diligence (underway) binding Phase 1 production offtake secured with Glencore

Our 100% owned HMW and Candelas projects are within a 20km radius of Arcadium (formerly Livent & Allkem) and POSCO tenure

1. Refer ASX Announcement 27 March 2024
2. Refer ASX Announcement 1 June 2023

Agreement with Catamarca Government

Galan signs pivotal commercial agreement to commercialise lithium chloride concentrate¹

- ✔ Galan has signed a commercial agreement with the Catamarca Government in support of the grant of permits to enable lithium chloride concentrate to be sold locally or exported internationally
- ✔ Galan's ability to export lithium chloride concentrate is expected to facilitate access to a larger customer base, potentially offering enhanced offtake terms and funding/prepayment opportunities
- ✔ The agreement includes royalty arrangements (7%), potential advance payments and a commitment by Galan, after 4 years, to pursue further downstream processing routes (eg lithium carbonate)
- ✔ The agreement cements an important prerequisite required for the grant of **Phase 2** permits (currently under application)
- ✔ This agreement further significantly de-risks the strategy and provides evidence of our very strong, positive and collaborative relationship with local authorities and our community. It is expected to pass into legislation in 2024

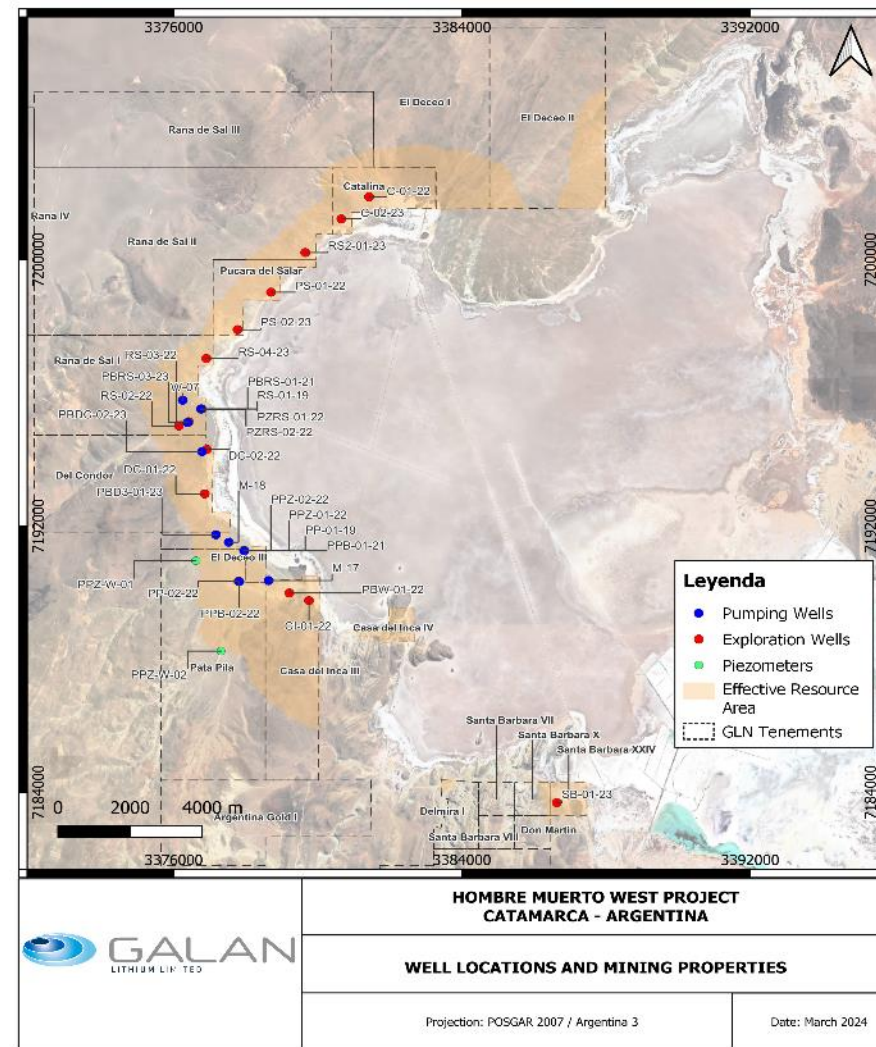

1. Refer ASX Announcement 22 April 2024.

4th increase in HMW Resource since March 2020

Consistent high grade, low impurity profile

HMW Mineral Resource increased ~20% to 7.9Mt contained LCE @ 883 mg/l Li - 60% in Measured category¹

- No cut-off grade applied to Resource
- Inclusion of Catalina tenements has added ~1.3Mt LCE to the HMW resource
- Measured Resource of 4.7Mt LCE at 866 mg/l Li
- This resource update cements the resource base supporting our 4 stage long term production target of 60ktpa LCE

1. Refer to slide 21 for further detail, the HMW West Mineral Resource information has been extracted from ASX announcement entitled "Galan Increases Resource by 18% to 8.6Mt LCE @ 859mg/l Li" dated 27 March 2024. Galan confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and, in the case of Mineral Resources or Ore Reserves, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. Galan confirms that the form and context in which the Competent Person's findings are presented have not been materially modified.

Phase 1 HMW Construction Update

Full Phase 1 HMW construction permits granted, construction is underway¹

Phase 1 construction works are well underway, evaporation has commenced, on track for delivering lithium chloride production of 5.4ktpa LCE in H1, 2025

Engineering and long lead items procurement includes pond construction, liners, filters, laboratory, camp and other infrastructure

HMW Phase 1 construction on schedule²:
Pond 1 & 2 complete and filled
Pond 3 earthworks complete, liners 60% complete.
Pond 4 earthworks have commenced

Offtake and funding negotiations are well advanced

1. Refer ASX Announcement 8 August 2023
2. Refer ASX Announced 29 April 2024

Glencore Agreement for Offtake & Financing

Binding offtake agreement underpins 100% of sales for the first 5 years of production

- ✓ Binding offtake with Glencore for lithium chloride and/or lithium carbonate production from HMW Phase 1
- ✓ Glencore is one of the world's largest globally diversified natural resources companies
- ✓ Glencore will accept offtake for Galan's lithium chloride for toll treatment into lithium carbonate for sale in Argentina or export
- ✓ Glencore has also offered to provide or facilitate a Financing Prepayment Facility up to US\$ 100 million
- ✓ Partnership with Glencore endorses Galan's low-cost, low-risk lithium chloride development strategy
- ✓ Due diligence continues to progress, site visit completed

Offtake terms

GLENCORE

Term	Description
Supply term	Initial period of 5 years from commencement of commercial production at HMW
Product	Technical grade lithium chloride
Quantity	100% HMW production
Pricing	Reference to a mutually agreed lithium carbonate price index over a quotational period less a marketing fee, discount and penalties (if any)

Compelling Economics

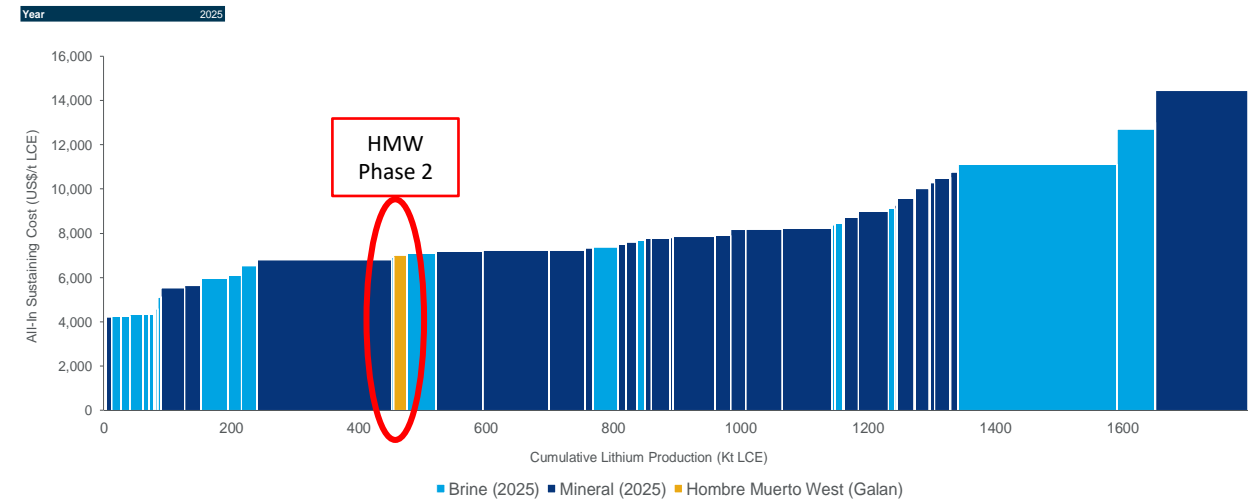

Phase 2 DFS Announced 3 October 2023

Flagship 100% Owned HMW Project

- ✔ 1st quartile on the industry cost curve
- ✔ LiCl concentrate production of 21 ktpa LCE
- ✔ Low operating cost of \$US3,510/t LCE is lower than most spodumene producers, equivalent to SC6 \$US310/t- \$US350/t
- ✔ All in sustaining cost US \$7,000/t LCE, +40 yr life
- ✔ Unlevered post-tax NPV8% of US \$2b
- ✔ Post-tax IRR of 43%, approx. <3 year payback
- ✔ Post-tax Free annual cashflow US \$236m

Cost Analysis - Lithium Carbonate Equivalent Cost Curve

Environment, Social & Governance (ESG)

Galan is one of the few Li companies expected to be first quartile in both Industry GHG Emissions intensity and All in Sustaining Costs (AISC)

*Source: Wood Mackenzie Emissions Benchmarking Tool (Metals) December 2023 + Galan calculations for HMW Phase 1

Low Risk – Staged, Flexible Production Plan

Fast track route to Li production

Targeting first-phase HMW Li concentrate production in H1 2025

	Phase 1 – >5.4ktpa LCE	Phase 2 – 21ktpa LCE	Phase 3 – 40ktpa LCE	Phase 4 – 60ktpa LCE
Status 	Construction well underway with full construction permits granted	DFS delivered 3 October 2023	Evaluating stage (permitting and DFS commences after phase 2)	Evaluating stage (permitting and DFS commences after phase 3)
Project 	HMW	HMW	HMW	HMW & Candelas
Product 	High grade, low impurity Li chloride concentrate 6% (H1 2025)	High grade, low impurity Li chloride concentrate 6% (2026)	High grade, low impurity Li chloride concentrate /carbonate (2028)	High grade, low impurity Li chloride concentrate /carbonate (2030)
Benefits 	Accelerated construction path, lower project capex and opex costs (incl power/water), offtake and financing prepayment facility in place (pending DD), 2 yrs earlier cashflows than if producing carbonate	Staged construction on back of phase 1, current production ponds included in phase 2 requirements, offtake and pre-payment opportunities	Modular expansion, less infrastructure investment required, lower opex and capex costs	Modular expansion, less infrastructure investment required, lower opex and capex costs

Highly Experienced Team

With a proven track record

Richard Homsany
Non-Executive Chairman

- Experienced corporate lawyer with extensive board and operational experience in the resources and energy sectors.
- Executive Chairman of ASX listed Toro Energy Limited (ASX:TOE), Executive Vice President, Australia of TSX listed Mega Uranium Ltd (TSX:MGA), Chairman of Health Insurance Fund of Australia Ltd.
- Principal of Cardinals Lawyers and Consultants, a boutique corporate and energy & resources law firm.

JP Vargas de la Vega
Founder & Managing Director

- Chilean/Australian mineral industry professional with 20 years' broad experience in ASX mining companies, stockbroking and private equity firms.
- Specialist lithium analyst in Australia, operated a private copper business in Chile and has worked for BHP, Rio Tinto and Codelco.
- Founder of and vendor of the original Argentinian assets.
- Galan's Managing Director since mid 2018.

Daniel Jimenez
Non-Executive Director

- Civil industrial engineer having worked for world leader in the lithium industry Sociedad Química y Minera de Chile (SQM) for 28 years based in Santiago, Chile.
- Most recent position was as Vice President of Sales of Lithium, Iodine & Industrial Chemicals where he formulated the commercial strategy and marketing of SQM's industrial products and was responsible for over US\$900 million worth of estimated sales in 2018.

Terry Gardiner
Non-Executive Director

- Over 25 years experience in corporate finance, capital markets, stock broking & derivatives trading.
- Executive Director of boutique stockbroking firm Barclay Wells Limited.
- Non-Executive Director of Cazaly Resources Ltd and Charger Metals NL.

Claudia Pohl
Non-Executive Director

- Civil industrial engineer with over 23 years' senior executive experience at Sociedad Química y Minera de Chile (SQM) a world leader in the lithium industry.
- Since leaving SQM, she has been Managing Partner and General Manager of Chilean based Ad-Infinitem, a process engineering consultancy, with specific focus on lithium brine projects under study and development, and the associated project evaluations.

Highly Experienced Team

A strong and talented group of professionals with world class knowledge and extensive local experience

Juan Carlos Barerra

Project & Board Consultant

- Over 33 years mining experience in Chile, Argentina and Australia incl 28 years working for SQM (ex senior VP Operations), and two for Exxon

Boris Caro

Project Advisor/Director

- 20 years project management experience including senior roles with Orocobre (now Arcadium Lithium) and BHP

Alvaro Henriquez

Group Geology Manager

- 20 years applied geology and hydrogeology experience including senior roles with SQM & WSP

Francisco Lopez

Exploration Manager

- 15 years exclusively in lithium exploration in Argentina including Orocobre (now Arcadium Lithium), Neolithium and Lake Resources

Pablo Sanz

Business Development & Permitting

- 25 years of prospecting in Argentina and tenement management

Supported by a professional and dedicated team of staff and contractors, working towards a common goal

The Premier Lithium Developer

Strong local community and government support, evidenced by the grant of full Phase 1 construction permits

Solid local team, including ex SQM executives and team members that bring experience in Lithium project execution and marketing in the region

The best Lithium project in Argentina (high grade, low impurities) with low operating costs. Phase 1 de-risked and progressing towards cashflow in H1, 2025, with a growth pathway to 60ktpa LCE

Further project pipeline – Hard Rock Exploration Upside

New drilling campaign planned < 5km from Greenbushes Mine in H1 2024

Greenbushes South Lithium Project – 100% ownership

- Tenements intersect the Donnybrook-Bridgetown Shear Zone
- 1st drilling completed; assay results & interpretation released on 21 Sep 2023
- Calibration of previous drill data helps enable new targets and geophysics interpretation
- Team are preparing for the next drill campaign in H1 2024

Mineral Resource & Ore Reserve Estimate

Mineral Resource Estimate

Mineral Resource Statement for Candelas¹

Category	In situ Li (kt)	Avg. Li (mg/l)	LCE (kt)	Avg. K (mg/l)	In situ K (kt)	KCl Equiv. (kt)
Indicated	129	672	685	5,193	1,734	3,307

Note: 500mg/l Li cut-off grade for Candelas. These results refer to the drainable porosity, the specific yield (SY) values used are as follows;

- Sand: 12.5%
- Gravel: 6%; and
- Halite: 4%

There may be minor discrepancies in the above table due to rounding.

The conversion for LCE = Li x 5.3228, KCl = K x 1.907

Mineral Resource Statement for Hombre Muerto West²

Category	In situ Li (kt)	Avg. Li (mg/l)	LCE (kt)	Avg. K (mg/l)	In situ K (kt)	KCl Equiv. (kt)
Measured	890	866	4,738	7,505	7,714	14,711
Indicated	310	894	1,649	7,837	2,717	5,181
Inferred	278	926	1,480	8,210	2,464	4,700
HMW total	1,478	883	7,867	7,700	12,895	24,591

Note: No cut-off grade to the updated Mineral Resource Estimate.

There may be minor discrepancies in the above table due to rounding.

The conversion for LCE = Li x 5.3228, KCl = K x 1.907

1. The Mineral Resource information in this presentation is extracted from the ASX announcement entitled "Excellent PEA Results for Candelas Project", dated 30 November 2021

2. The Mineral Resource information in this presentation is extracted from the ASX announcement entitled "Galan Increases Resource by 18% to 8.6Mt LCE @ 859mg/l Li", dated 27 March 2024

Galan confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and, in the case of Mineral Resources or Ore Reserves, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. Galan confirms that the form and context in which the Competent Person's findings are presented have not been materially modified.

Ore Reserve Statement

Ore Reserve Statement for Hombre Muerto West (effective date September 2023)

Ore Reserve Category	Well Field	Production Period (Years)	Pumped Brine Vol. (Mm ³)	Li Metal (kt)	Avg. Li grade (mg/L)	LCE (kt)
Proven	West	1-7	34.9	30.8	884.0	101.2
	Santa Barbara	-	-	-	-	-
Probable	West	1-7	1.8	1.5	840.2	5.1
		8-40	192.1	168.5	877.1	552.9
	Santa Barbara	1-40	55.5	44.9	807.9	147.2
Total Proven		1-7	34.9	30.8	884.0	101.2
Total Probable		1-40	249.5	214.9	861.5	705.2
Total Proven and Probable		1-40	284.3	245.7	864.2	806.4

Notes:

- Ore Reserves are inclusive of the declared Measured and Indicated Mineral Resources.
- No cut-off grade is applied for the HMW Ore Reserve.
- A combined process recovery factor of 61.65% was applied. Extracted Li metal in the table does not consider this factor.
- "Li Metal" and "LCE" are expressed as total contained metals.
- Lithium carbonate equivalent (LCE) is calculated using mass of LCE = 5.3228 multiplied by the mass of lithium metal.
- Ore Reserves do not consider any Mineral Resources at Candelas North.
- There may be minor discrepancies in the above table due to rounding.

Galan confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and, in the case of Mineral Resources or Ore Reserves, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. Galan confirms that the form and context in which the Competent Person's findings are presented have not been materially modified.
